rafiakhurshid00@gmail.com | [Portfolio](#) | [Github](#)

Full-Stack Web Developer & AWS Cloud Infrastructure Specialist specializing in Next.js, React, TypeScript, and Amazon Web Services (AWS). Experienced in building high-performance web applications and deploying scalable, fault-tolerant cloud infrastructure (EC2, ALB, S3, and EBS). Proficient in live zero-downtime storage expansion, security group hardening, traffic routing, and modern frontend/backend practices. Committed to writing clean code and engineering reliable digital solutions.

PROJECTS

SEO-Optimized MDX Blog Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, Contentlayer, MDX

Description:

Developed a dynamic blog platform using Next.js and MDX, enabling content creation through markdown files with automatic static page generation and SEO optimization.

Key Features:

- Built dynamic blog routing using Next.js App Router .
- Integrated Contentlayer to fetch and manage MDX-based blog content.
- Implemented automatic static page generation with `generateStaticParams`.
- Created dynamic SEO metadata including Open Graph, Twitter Cards, and structured JSON-LD schema.
- Developed an auto-generated Table of Contents (TOC) from article headings.
- Added responsive article layouts using Tailwind CSS.
- Implemented optimized image handling with Next.js Image component and blur placeholders.
- Enabled article categorization and category-based dynamic pages.
- Generated SEO-friendly URLs using slugs.
- Configured article publishing workflow based on MDX content files.
- Improved search engine visibility through Schema.org Article markup and social sharing metadata.

AI-POWERED SMART CONTENT GENERATOR

- Developed a high-performance Full-stack AI application using **Next.js 14** and **Groq Cloud API** for near-instant text generation.
- Implemented a custom **History Sidebar** with **Local Storage** to persist user queries and AI responses across browser sessions.

- Engineered efficient API routes in Next.js to handle asynchronous requests and secure environment variables.
- Designed a responsive, minimalist UI using **Tailwind CSS** for a seamless user experience.

TECHPLUS | FULL STACK E-COMMERCE WEB APPLICATION

TECH STACK: Next.js, TypeScript, Tailwind CSS, Sanity CMS, JWT Authentication, Recharts, Stripe (Architecture Ready)

- Developed a responsive full-stack e-commerce web application using Next.js App Router and Typescript.
- Built a secure JWT-based admin authentication system with protected dashboard routes.
- Implemented complete product management (Create, Read, Update, and Delete) integrated with Sanity CMS.
- Developed an order management system with real-time order status updates (Pending, Shipped, and Delivered).
- Designed an analytics dashboard displaying total products, orders, revenue, today's sales, monthly revenue trends, top-selling products, and recent order activity using Recharts.
- Integrated shopping cart functionality with a checkout flow supporting Cash on Delivery and a payment architecture ready for Stripe integration.
- Optimized performance using server-side rendering, API routes, and responsive UI built with Tailwind CSS.

Kitchen Utensils E-Commerce Website

Tech Stack: Next.js, TypeScript, Tailwind CSS, Sanity CMS, GROQ, AI Chatbot

- Built a full-stack e-commerce platform for kitchen utensils with product management, COD checkout, and order tracking.
- Developed an admin dashboard for managing orders and updating statuses.
- Integrated Sanity CMS for content management and GROQ for data fetching.
- Added AI-powered customer support chatbot using Groq API.
- Implemented search and filtering functionality for efficient order management.

E-Commerce Website with Stripe Integration

Tech Stack: Next.js, React.js, Tailwind CSS, Stripe API, JavaScript/TypeScript, Vercel

- Developed a responsive e-commerce web application using Next.js and Tailwind CSS.
- Integrated Stripe for both product management and secure payment processing.
- Retrieved product data dynamically from Stripe using Stripe APIs.
- Built product listing, product detail, shopping cart, and checkout functionality.
- Implemented secure checkout sessions and payment confirmation workflows.
- Optimized performance and user experience using Next.js features.
- Designed a mobile-friendly and modern user interface with Tailwind CSS.

NEXT COMMERCE

- Built a full-stack eCommerce application using Next.js 14, TypeScript, Tailwind CSS, Sanity CMS, and Stripe Checkout.
- Implemented secure payment processing with Stripe Webhooks, dynamic product management, shopping cart functionality, and order management system.

SERENE

- Frontend website using Tailwindcss for styling
- It's a beauty parlor website that showcase their products and Treatments they offer.

AWS HIGH-AVAILABILITY CLOUD INFRASTRUCTURE & DEPLOYMENT

TECH STACK: AWS (EC2, ALB, S3, EBS), Linux, Apache, Security Groups, AWS CLI

- Engineered scalable cloud infrastructure on AWS for web applications with custom Security Group rules and port management.
- Executed live, zero-downtime EBS volume expansions using growpart and xfs_growfs filesystem resizing to prevent downtime.
- Configured an Application Load Balancer (ALB) with Target Groups and automated Health Checks to route traffic across multi-instance web deployments.
- Created custom AMIs for automated server backups, rapid restoration, and environment replication.
- Configured Amazon S3 buckets for media hosting and set up automated AWS Budget alerts for cloud cost control.

CORE COMPETENCIES

CLOUD & INFRASTRUCTURE: AWS (EC2 Lifecycle, Application Load Balancers (ALB), S3, EBS Storage Expansion, Security Groups, Custom AMIs, AWS Budgets), Linux Administration, Apache, AWS CLI.

WEB DEVELOPMENT: MERN Stack (MongoDB, Express.js, React.js, Node.js, Tailwindcss, Nextjs).

BACKEND & API DEVELOPMENT: RESTful API design, Node.js, Express.js.

PROGRAMMING LANGUAGES: C, C++, C#, JavaScript, React, Nextjs, python.

DATABASE & CMS: MongoDB, Sanity CMS.

PAYMENT INTEGRATION: Stripe.

PROJECT MANAGEMENT: Hands-on with end-to-end development lifecycle, agile-friendly workflow.

TOOLS & TECHNOLOGIES: Visual Studio Code (VS Code), Git/GitHub for version control, Postman and Thunder Client for API testing.

EDUCATION

BSCS, LAHORE COLLEGE FOR WOMEN UNIVERSITY, LAHORE

.NET SHORT COURSE, PUNJAB UNIVERSITY OF INFORMATION AND TECHNOLOGY

NEXTJS COURSE, DEVKINS SOLUTIONS

Completed a comprehensive web development course, working on diverse projects using Next.js, Tailwind CSS, and MongoDB. Gained hands-on experience in building responsive, full-stack applications with modern technologies.

MICROSOFT AZURE AI-103 CERTIFICATION

Completed a 6-day Azure AI training/project through MetaPi, covering practical Azure AI services and concepts.

AWS CERTIFICATION / TRAINING

In Progress: AWS training through practical cloud projects, covering core AWS services, EC2, storage, security, and cloud infrastructure.
